

## Multiple Stimulus Without Replacement (MSWO) Data Sheet

### Data Collection Instructions:

1. Write the item or activity next to the number.
2. Record the number that corresponds to the order each item was selected (1 = Picked first; 8 = Picked last) in the column under the item name and in the row of the correct array.
3. If the last items are not selected, assign the last numerical rank (e.g., 8). If the last 4 items are not selected, all 4 items will be assigned the last numerical rank.

		Items/Activities							
Date	Array	1	2	3	4	5	6	7	8

### Calculation Instructions:

Items/Activities							
1	2	3	4	5	6	7	8

Add the total value of each item's selection order and write it in the column of each item.

### Preference Ranking

#### Instructions:

Write the items in order from **lowest** total value to **highest** total value. The item with the lowest total value is the most preferred or number 1 on the list below. Choose the top three items to use as reinforcers when teaching new skills. If two or more items have the same selection totals, those items are equally preferred.

Most Preferred 1. \_\_\_\_\_  
 2. \_\_\_\_\_  
 3. \_\_\_\_\_  
 4. \_\_\_\_\_  
 5. \_\_\_\_\_  
 6. \_\_\_\_\_  
 7. \_\_\_\_\_  
 Least Preferred 8. \_\_\_\_\_
